

# Nuix eDiscovery

Powered by the patented Nuix Engine

“Nuix is a tool that brings sanity to the cost of eDiscovery without sacrificing the quality courts demand.”

Craig Ball  
Forensic Technology Specialist

Nuix can process, search and analyse vast quantities of unstructured data faster and more reliably than any other technology on the market. We make the hard work of eDiscovery and investigative search easier so you can meet deadlines, minimise risks and mistakes, reduce costs and maintain a strategic advantage throughout litigation.

Simple. Powerful. Precise.

# MAKE THE HARD WORK EASIER

Through relentless innovation, we have made Nuix the industry's leading platform for eDiscovery processing, investigation and analysis. We offer a suite of integrated tools and workflows to streamline eDiscovery across legal hold, collection, processing, analysis, review and production.

With Nuix, you're not restricted by the limitations of legacy tools or confined to conventional ways of doing things. Join hundreds of leading litigation support vendors, law firms, regulators, government agencies and enterprises that use Nuix to make the impossible possible.

## Process more data, faster

In the time it takes other technologies to evaluate how much case data you have, Nuix makes all relevant evidence available for searching, analysis and review. This enables you to meet court, regulator and client deadlines, make fact-based decisions from the outset and maintain a leading edge throughout litigation.

## Ingest everything, even the most difficult data

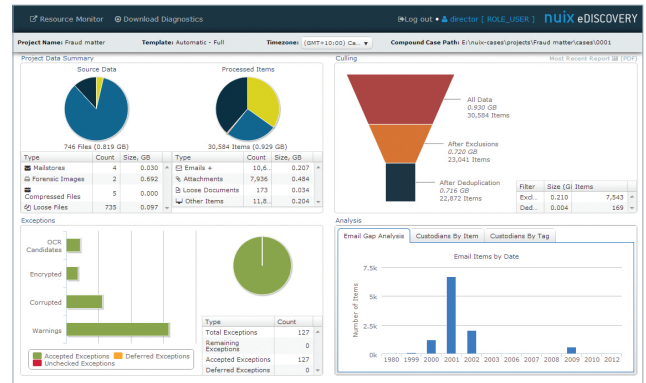

Nuix indexes the complex data sources everyone else ignores because they are 'too hard'. We find and directly index the contents of more than 400 file formats and storage containers including:

- Hard drives and flash memory devices
- Forensic images
- File shares
- Mobile devices
- Microsoft Exchange, Lotus Notes and other email databases
- Microsoft SharePoint
- EMC EmailXtender, Symantec Enterprise Vault and other email archives
- Cloud services including Amazon S3 Buckets, Microsoft Office 365 email\* and Microsoft SharePoint.

\* Available with the Email Archive Examiner option.

## POWERED BY THE NUIX ENGINE

Nuix's patented parallel processing engine can index virtually unlimited volumes of unstructured data at high speed. The Nuix Engine's forensic processing capabilities have been validated by courts, government agencies and corporations worldwide. It applies a unique combination of load balancing, fault tolerance and intelligent processing technologies to make any volume of data accessible faster than every other solution on the market.

*Nuix eDiscovery includes an easy-to-read dashboard that displays project progress at a glance.*

## Work with data in place and on site

Nuix indexes data at the source and in place. You can progress through collection, indexing, analysis and review without having to copy data from location to location or format to format. Nuix applications are highly portable, so you can install them behind the firewall and start processing within minutes.

## Play it your way

Nuix eDiscovery gives you two ways to work with case data using the Nuix Engine:

- **Nuix Director**, a new web application with comprehensive reports, an easy-to-read dashboard and automated, template-driven workflows. This enables discovery analysts and technicians to deliver consistent, repeatable and defensible results with minimal training.
- **Nuix Workstation**, our traditional desktop application for eDiscovery experts. It provides direct, fine-grained control over all functions of the Nuix Engine.

## Deliver consistent results at a lower cost

Nuix Director enables your most skilled eDiscovery practitioners to codify their knowledge into templates and workflows for others to use. This means that with minimal training, you can empower employees to complete difficult eDiscovery tasks and achieve consistent, audited and defensible results. This improved ease of use and Nuix's rapid data processing help you reduce the cost of delivering eDiscovery services to internal or external clients.

## More ways to work with your data

Nuix eDiscovery provides many ways to slice and dice data so you can quickly locate and work with the relevant facts.

Nuix eDiscovery:

- Provides powerful auto-classification, deduplication and near-duplicate management to simplify searching and minimise data sets.
- Exports into all major legal export formats and review platforms, including Nuix subcases, Nuix eDiscovery Reviewer and deep integration with kCura Relativity.
- Processes non-text PDFs and images with integrated optical character recognition, and adds recognised text to the index in a single step.
- Summarises data using interactive graphical displays and visual analytics that make it easy to drill down to the most pertinent information.

## Simple licensing

Nuix eDiscovery is available as a single product with advanced capabilities – including auto-classification – in one licence price. You simply select the number of processors to suit the processing speed and case size that meets your needs.

## A partner for the future

Nuix is invested in your success. We listen to our customers and deliver new products and technologies that solve your biggest eDiscovery challenges. If you need us, our experienced support team is ready to go above and beyond to remove any obstacle to your success.

## DIRECT YOUR eDISCOVERY PROCESS

Nuix Director is a web application that harnesses the power of the Nuix Engine into a consistent, repeatable and highly automated process.

It encapsulates our experience working with hundreds of law firms, litigation support vendors, regulators, government agencies and enterprises across tens of thousands of cases. It includes:

- **A web interface**—Provide an easy-to-use interface for eDiscovery professionals and access for customers without having to install client software.
- **Process automation**—Enforce workflows and settings to ensure each data source and item is treated consistently, minimising the risk of human error.
- **Workflow templates**—Adjust processing tasks and settings to suit different cases and customer requirements.
- **Comprehensive reports**—Summarise each aspect of your eDiscovery workflow in comprehensive reports for customers, managers and courts.
- **An easy-to-read dashboard**—Visualise the progress of your eDiscovery projects at a glance and drill down to reveal the intricate details.

NUMBER OF CORES <sup>1</sup>	INSTALLED ON	TYPICAL PROCESSING SPEEDS <sup>2</sup>	RECOMMENDED CASE SIZE <sup>3</sup>
2	Basic laptop or desktop	10 GB/hr	Up to 250 GB
2	Basic server	20 GB/hr	Up to 500 GB
4	High-end laptop or desktop	20 GB/hr	250 to 500 GB
4	High-end server	45 GB/hr	500 GB to 1 TB
8	High-end server	65 GB/hr	1 to 3 TB
16	High-end server	85 GB/hr	More than 3 TB

<sup>1</sup> Processor cores within a single PC or server. Multi-server solutions are available for larger case sizes and faster processing.

<sup>2</sup> Processing times are for email stored in PST files. Performance may be different for other formats.

<sup>3</sup> Recommended case size is based on indexing times as well as search, analysis and export performance for the volume of data.

## BUSINESS BENEFITS

With Nuix eDiscovery, you can:

- Complete eDiscovery tasks faster than you thought possible no matter how large or complex the data sources.
- Maintain a strategic advantage throughout litigation. Walk into any courtroom or pre-discovery conference with a comprehensive picture of the evidence and the strongest possible bargaining position. In some major cases, parties have settled once they learned the opposing side was planning to use Nuix for eDiscovery.
- Mitigate risks by ensuring a consistent, repeatable and defensible eDiscovery process across each item and data source.
- Reduce costs across the eDiscovery lifecycle with fast processing, sophisticated culling, streamlined processes and less reliance on highly skilled professionals.
- Leverage the knowledge of your eDiscovery experts to create templates and workflows that everyone can use to complete repetitive tasks.

## NUIX eDISCOVERY SOLUTIONS

Nuix's eDiscovery solutions deliver the power of the Nuix Engine throughout the litigation process – and beyond.

### Nuix eDiscovery

The world's fastest and most scalable electronic discovery platform, Nuix eDiscovery can process vast quantities of unstructured data, in virtually any format and location. You can choose a desktop application for eDiscovery experts and a web application for automating workflows.

### Nuix eDiscovery Reviewer

Enable multiple reviewers to concurrently access and analyse all case data in house or using secure web-based remote access, with a choice of legal review or investigative interfaces.

### Nuix Collection

A powerful, easy-to-use and forensically sound suite of tools to identify, collect and preserve any amount of digital evidence from laptops, desktops, file shares and Microsoft SharePoint.

### Nuix Legal Hold

A fast, efficient and defensible system for legal hold notification and compliance tracking.

### Nuix Contract Discovery

Identify rogue contracts stored in file shares, email and other storage locations across your organisation.

### Proof Finder

A made-for-charity product that delivers the power of Nuix for just US\$100 per year, with all revenue going to not-for-profit organisation Room to Read.

### Information Governance solutions

For organisations looking to move beyond reactive eDiscovery, Nuix Information Governance solutions enable you to make informed governance decisions by delivering Information Transparency™.

*Nuix Director applies a step-by-step workflow from ingestion to export.*

## ABOUT NUIX

Nuix is a worldwide provider of information management technologies, including eDiscovery, electronic investigation and information governance software. Nuix customers include the world's leading advisory firms, litigation support providers, enterprises, government departments, law enforcement agencies, and all of the world's major corporate regulatory bodies.
